Getting to Know Two New Research Projects in Indonesian Clean Energy Transition and Land-use Mitigation

The launch of two research projects - [LANDMARC](#) and [TIPPING+](#) brings fresh air to the renewable energy and land-use management sector in Indonesia. Through the international kick-off workshop on March 16, 2021, su-re.co officially introduced two renewable energy research projects in Indonesia to the public. Both research projects are funded by European Union Horizon 2020 Research and Innovation Programme.

Apart from these, su-re.co has recently awarded IKI Small Grant from GIZ to develop a blockchain system on biogas in hopes of providing financial benefits for farmers and users and sustainability benefits for nature and society through carbon trading from potential carbon offset.

Biogas for Bapak Rudy and Family

Last month, our engineering team installed one biogas donated by Tigermov Japan at Munggu, Bali. Bapak Rudy works as a farmer and he was happy to get this biogas. He hopes to get organic fertilizer for his farm and reduces his daily expenses. We hope Bapak Rudy and his family can be soon enjoying the benefit of biogas. We'll keep maintaining the biogas to make sure it works well!

The fragrant of soap and coffee in one product?

su-re.co Engages University of Tokyo Students to Explore Environmental Issues in Bali

A group of students from the University of Tokyo just finished their intensive 5-day training program organized by a group of international researchers - Sustainability and Resilience (su-re.co) on March 1-5, 2021. By bringing the theme

bringing the theme "Sustainability Challenges in Bali: Transdisciplinary Perspectives for Island Sustainability", students from different parts of the world were able to get together online to receive an immersive learning experience despite not meeting the trainers in person.

In response to the students' desire to learn about economic, social, environmental, policy changes, and social entrepreneurship, Bali, Indonesia was set as a case study.

This program will soon be open for educational institutions in Japan and overseas. In partnership with various organization, the training on environmental sustainability issues can also be customized to be attended by specific group from different countries. For further inquiries, check out su-re.co products and services on the website www.su-re.co/be or contact via email info@su-re.co.
