THINK-TANK

Our Giftmakers Go to Europe

Our current LANDMARC research project will conduct the first in-person general assembly in Utrecht, the Netherlands, from 15 - 17 June 2022! This is the first offline Project General Assembly (GA). This meeting's objectives are to update all Work Packages (WPs) and Case Studies (CS) progress and synergize all case studies and modellers to assess LMTs at national, regional, and global levels.

Our current TIPPING+ research project will conduct the first in-person general assembly in Glyfada, Greece, from 21 - 23 June 2022! This meeting's objectives are to facilitate interdisciplinary discussions across the Work Packages (WPs) and Case Studies (CSs) - Set the ground for developing an Integrative Framework and Mid-Range Theory of Socio-Ecological Tipping Points across all case studies. Stay tuned for more updates.

THINK-TANK

Feasibility Study

After the first half of the IKI Small grants project has passed, we discovered that tapping into the carbon market through certifications became a more viable option than blockchain. We have been working on Feasibility Study to prepare for a scaling-up phase. We will study the potential of realizing a certification process to create a long-term sustainable financing model for a biogas carbon offset project. Stay tuned to find out more!

Science Updates

Everything we do is scientifically proven. Check out our most recent publications to learn more about the technical research aspects behind our activities.

THE CLIMATE COLLECTIVE

Installation for Komang Mertayasa family

DO-TANK

More Biogas from Climate Collective

Our gift makers, Fabian, Bianca, and together with BMKG Jembrana installed one biogas in Ekasari Village, Melaya, Jembrana. This biogas digester is donated by Climate Collective, one of our biogas donors. Climate Collective helps our farmers to get access to clean energy. This biogas digester was installed in Komang Mertayasa's house. He is a farmer who takes care of 6.000 chickens and a cow. He has 2 hectares of land which is planted with coconut, banana, and cacao. Before using our biogas, he uses firewood and LPG for cooking.

Komang has diligently filled the biogas with cow manure and 3 weeks after the installation, the biogas stove starts producing fire. Now he uses the biogas stove for cooking. The bio-slurry produced is used to fertilize the coconut, banana, and cacao that he has. Seeing this biogas, Komang's neighbors are interested to switch to clean energy.

“Climate change is real as the traditional Sasih calendar can no longer be used to predict the weather.”

Kenari: Nutritious Nut from Maluku

Sinar Hijau Ventures (SHV) works with indigenous communities in Maluku and assists them in organizing collectively to advance in the value chain and chase new market opportunities for natural forest products, such as Kenari Nuts.

One of their targeted area for sustainable agroforestry value chain development is Leihitu Barat, home to over 22,000 people, living on the coast of an area classified by the IUCN as a key biodiversity area, mostly covered by primary forest and presenting a uniquely high concentration of endemic species. The region is particularly exposed to poverty, with nearly 18% of the population living in poverty.

SHV is a social enterprise that aims to help Indonesian farmers get sustainable and deeper access to global markets. Community-based business models are central to their approach. They are committed to developing a pipeline of green investments in agroforestry to incentivize forest-dependent communities to invest in ecosystem conservation.

Kenari is part of the local culinary tradition known for its high nutritional value. It is a nutritious nut rich in protein and nutrients such as magnesium, potassium, and calcium. It is harvested naturally in mixed forests, without pesticides and fertilizers. We are currently working with some potential partners to sell Kenari Nuts in Japan.

When it comes to the agricultural business, vanilla is known as "black gold." There are two types of vanilla beans that our farmers grow: tahitian and bourbon. It is one of the most expensive commodities in the market and requires a special technique to support the vanilla pollination process.

One of Japan's largest import chains has ordered dried vanilla beans from su-re.co. We are working together with farmers in Petang, Bali to produce dried vanilla product and deliver it to Tokyo. We are looking forward for upcoming future collaboration with potential business partners to strengthen vulnerable farmers to produce and sell Climate-Smart products including the black gold.

su-re.college Programme

The su-re.college programme offers students and recent graduates the opportunity to gain direct practical experience with su-re.co's work related to climate change and sustainability issues. This program allows you to get experience both online and onsite.

su-re.college comes with USD 20 registration and USD 200 tuition fee (for foreign applicants). We will provide a curriculum for each programme to encourage individuals and giftmakers within each discipline by thinking deeply about the nature and practices of their knowledge and to invite students or young graduates, including at the undergraduate level, to learn by engaging in some of those distinctive practices.

→ THINK-RESEARCH

You will get involved in research and consultancy activities related to the climate change and sustainability issues. Some activities including data analysis, writing papers, proposals, or other relevant assistance.

su-re.co offers the opportunity to hone research thinking and skills while applying it to a real-world context engaging with various stakeholders such as governmental bodies, research institutes, non-governmental organisations (NGOs), and local communities.

→ DO-ENGINEERING

This position will support several projects related to engineering activities under su-re.co Do-Engineering tank, particularly developing portable biogas digesters.

Through this programme, su-re.co offers the opportunities for young generation to exercise their communication and management skills to solve energy-related issues in poor and emerging economy context like Indonesia.

→ DO-BUSINESS

This program is a B2B Sales Business Development role created for students with some sales experience. The idea is to discover best sales opportunities and practices through a variety of do-business

activities with our climate-smart product such as su-re.coffee, su-re.cocoa, etc. su-re.co offers a great opportunity to hone communication and design skills while developing green business to a real-world context with various organizations, communities, and government institutions.

→ BE-EVENT

su-re.co continues to expand its sustainability training with schools and local and international organizations. The main objective of su-re.co's training and events is to give the experience of the

current sustainability issues in the world and specifically in Indonesia. These activities consist of knowledge sharing on developing sustainability-related technology/projects. su-re.co offers you the opportunity to apply your knowledge directly to our local and international partnership from government, institution, school, to community and improve transversal training and communication skills – communication, project management, public relations, etc.

Tourism Workshop

SU-RE.CONNECT PROGRAM

su-re.connect is one of our learning programs that offer overseas students to connect and develop the local community in Indonesia. This time we connect Nanako Hori, a Japanese student who is studying Tourism Management at HELP University Malaysia with Genau Indonesia, an NGO that is currently developing eco-tourism in Petungkriyono - Central Java.

During their weekly discussion, Nanako and Genau team found out that people in Petungkriyono are not aware yet of the bad impacts of a lack of management of tourism, Nanako and Genau team initiated conducting a workshop for the young generation that is becoming contributors to Petungkriyono tourism. As a student of Tourism Management, Nanako decided to give an

explanation about Sustainable Tourism as she thinks it is important to introduce sustainability and connect to tourism.

There were around 15 young participants that joined Nanako's workshop online, they were really enthusiastic and active in joining the workshop. The participants were really concerned when Nanako explain the negative impacts that we need to avoid from tourism activities. The workshop went very well, even the participants requested us to conduct more workshops.

“ By implementing Sustainable Tourism, tourists will realize the importance of community & ecosystem

- Nanako Hori

Gender-Just Energy Transition in Indonesia

Calling for Early-Career Artists Indonesian Women to Join International Report Design Competition

with total
worth of prizes
**IDR
4,500,000**

REGISTER NOW!
ENTRY DEADLINE
07 - 30 JUNE 2022

Get the chance to design
the International ADB and
su-re.co Research Report

About The Competition

The Southeast Asia Regional Department of the Asian Development Bank (ADB) seeks to expand its understanding and knowledge of gender-related issues, challenges, and opportunities in the just transition of the renewable energy sector in Indonesia. To achieve this, ADB will engage the consulting team to conduct an exploratory study to identify gender equality considerations in Indonesia's energy transition to renewables and analyze this using a just transition framework.

To design the study report, a panel of judges from the ADB and the consulting team will curate the submissions that reflect the theme best and have the greatest potential to be displayed on the official ADB Project Report and digital platforms during the selection process. The Report Design Competition is purposefully designed to provide opportunities for Indonesian women (early-career artists) to showcase their artwork to a wider audience in the ASEAN region, and ADB and su-re.co's EU audience.

The ADB Project Report Competition carries the theme, 'Gender-Just Energy Transition in Indonesia'. The competition will run until 30th of June 2022, and winners will be selected by a panel of judges and announced on the 7th of July 2022.

The PRIZE

First Place

The winner will get **Rp 2,250,000** cash and will be hired to work on an international Gender and Energy Transition project from the Asian Development Bank and the consultation team (su-re.co, TUD, and University of Sussex)

Second Place

The winner will get **Rp 1,500,000** cash + su-re.co merchandise, and discount coupons for all su-re.co products.

Third Place

The winner will get **Rp 750,000** cash + su-re.co merchandise and discount coupons for all su-re.co products.

- The prize will be given to the winners the day after the announcement. All winners also have potential opportunities to collaborate with su-re.co in the future.

Terms and Conditions

- **Individuals** – Entries are limited to women of Indonesian citizenship, early in their art careers i.e., not exceeding eight years of professional experience. Only entries from individuals will be accepted i.e., group collaborations are not eligible.
- Participants can **ONLY** submit one artwork in one entry. Submission must include a context and indicate the title (mandatory).
- Submission must include a story and a clear message reflecting the theme of “Gender-Just Energy Transition in Indonesia” in different sectors: Housing, Industry, Infrastructure Education, Business, Cultural and Social, Transportation, and Agriculture.
- Artwork that has been submitted to other competitions or has been previously exhibited or sold is not acceptable and is ineligible for this competition. We reserve the right to request evidence that an entry is the original property of the participant and submitted solely by the participant for this particular competition. Non-compliance with this rule will result in disqualification of entry.
- The artwork cannot contain third-party copyright logos or material. It must not violate the rights of any person or entity, including copyright, privacy, or any other intellectual property rights. Upon submitting artwork to this competition, the participant is solely responsible for any infringement of copyrighted materials.
- The artwork submitted must not contain inappropriate, offensive, discriminatory, sexually inappropriate, or unlawful content. Artwork deemed inappropriate by the panel of judges will be disqualified.
- Artwork entries must not have watermarks, timestamps, date stamps or borders.

How To Submit The Artwork

- Artwork entries **MUST** be created in digital format.
- Submit your entries by filling out the entry form at bit.ly/art4energy
- Upload the artwork and the description on your Instagram and other social media, tag @adb_hq @su-re.co, and use the hashtag #GenderEquity #CleanEnergyTransition #JustTransition #RenewableEnergyProject #ADBProject #IndonesianWomanArtist #Art4GenderEquity #Art4JustTransition
- Alternatively, you can send your submission via email to info@su-re.co, with “Submission for ADB Project Report - Design Competition - Name of Applicant” as the subject of your email.

Gifts We Make

Get a taste of our climate-smart products from Indonesian farmers using organic fertilizer and clean energy from our biogas

Climate-Smart su-re.cocoa

Bright and fruity character of 65% dark chocolate from Tabanan - Bali with coffee beans inside

50 gr 25 gr

Climate-Smart su-re.coffee Bajawa

A fully washed and medium roasted Arabica from Bajawa, Flores with sweet aromatics, fruity notes, and long chocolate finish

250 gr 50 gr

Climate-Smart su-re.coffee Kintamani

An aromatic and sweet flavor coffee with the taste of combination between fruit and herb. Fully washed and medium roasted Arabica from Kintamani, Bali

250 gr 50 gr
