

# What is su-re.co?

**E**stablished in 2015, su-re.co (Sustainability and Resilience.co) is an environmental Think-Do-Be-Tank based in Bali. Our homework is to create a **sustainable and resilient community (be) that can transform good intentions and deep thought (think) into direct action (do).** su-re.co is a **gift-maker** delivering a sustainable meaning in **scientific knowledge (think), craft (do), and ourselves (be).** Our mission is to realise the vertical integration of sustainability, which synergises research, technologies, and learning into meaningful business. In short, su-re.co's strategy is "a **vertical integration for sustainability**".

## THE CLIMATE SMART GIFT

*"A gift from farmers to you, your family and friends and back to the environment."*

## Help Indonesian Farmers Get Access to Clean Energy

**D**id you know? Cooking with firewood causes indoor air pollution and impacts our health. Cooking with firewood is usually seen in rural area, making them the vulnerable communities. Indonesia has 23.5 million hectares of farmland and produces 345,700 tons of cow dung, based on the data from BPS. If we can maximize this potential, rural communities, farmers, and our planet will benefit.

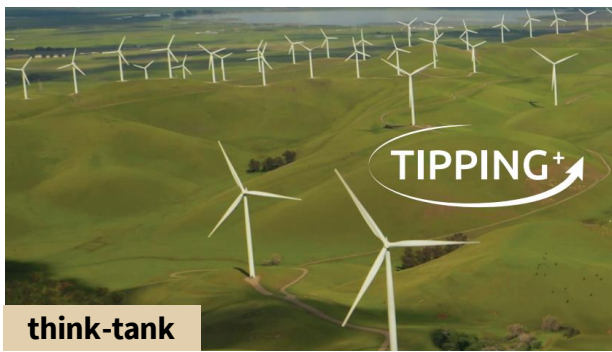

28 families have enjoyed the benefits of our biogas digesters and we are eager to install more for Indonesia's farmers...to be continued in the next page.

## Get to Know More about TIPPING+ Project

TIPPING+ brings together an international transdisciplinary team of scientists working closely with practitioners and civic organisations to understand and bring about the emergence of positive Social-Ecological Tipping Points (SETPs) in coal and carbon intensive regions. The project will carry out a systematic and comparative analysis of at least twenty Coal and Carbon Intensive Regions around the world, including Indonesia. As part of the TIPPING+ consortium, su-re.co will explore tipping points toward the clean-energy transition from the perspective of Indonesia as an emerging country. From a policy su-re.co will focus on the phase out of coal use in the energy systems of Banten and promote biogas installation at the household level in Bali from a policy perspective.

## We Are Hiring IT/Programming Interns

**WE ARE  
HIRING!**

PROGRAMMING/IT INTERN

Please fill in the application form in :  
<https://su-re.co/internship/>

be-tank

Are you the one we are looking for?

su-re.co is hiring Programming/IT interns to work together with our giftmakers to build a system for our biogas data!

Apply as soon as possible through <https://su-re.co/internship>

## su-re.co Goes Online!

This challenging situation will not stop us from making impacts for the environment and society. We are very thankful, there are lots of people are aware on environmental issues and very kind to support Indonesian farmers to get better access to clean energy.

Our crowdfunding in collaboration with a Japanese NPO - Living in Peace had a great success! We have reached 100% of the goal in the first 10 days and started our new challenge by setting higher goals. We have also successfully sent few samples of our product to Japan!

Apart from crowdfunding, we also build relationship and engage with more people in Japan by organizing several online event and trainings. Our CEO, Takeshi Takama started an online SDG training for Japanese high school students with more than 200 students participating

every week and Japanese Online Salon with more than 60 members. Dr. Takama also get featured by Japanese TV program - The Social! We have also conducted online events as shown by these photos. In Indonesia, we also started several online event with local organizations and communities to share the knowledge about climate change, sustainable energy, sustainable business until composting. Check out these graphics for more details!
