

Established in 2015, su-re.co (Sustainability and Resilience.co) creates a **sustainable and resilient community** (be) that can turn a **goodwill and deep thought** (think) directly into a **meaningful action** (do).

Our mission is to be a **gift-maker** delivering a sustainable meaning in scientific knowledge (think), craft (do), and ourselves (be) hence we believe in the values of **think sustainable, do sustainable and be sustainable**.

Have you heard about gift maker?

A gift maker is the one that helps create sustainable product from su-re.co to the farmers! Biogas digester is one of the product of gift maker.

Gaspard Blanchet is one of our gift makers. He studies Entrepreneurship and Innovation in Paris and joined us as Green Business Development intern.

"Be creative and always ready to question yourself and have a critical mindset in the sense that you are able to move forward and if you have to change your opinion,

Did you know?

Reduce single use plastic

Not all kind of plastic can be recycled! It is only 9% of plastic waste that has been recycled all over the world, hence it is essential to start reducing single use plastic in our daily life. Bali Province has also been banning single use plastic. So, let's start from now on!

Green School Students Will Have their Lunch Cooked with Biogas

Our gift makers – Mayun, Fabian and Martin were installing biogas for Green School Bali. Unlike the other biogas, this biogas will be using kitchen waste as source of energy. Once it is full of gas, they will be using it to cook lunch for the students!

We are expanding to Youtube!

Who does not know youtube? In this digital era, youtube is becoming a major source of information.

Started from this year, our youtube channel is more active on sharing videos for tutorial, testimonial and even we just launched our vlog "su-re.community".

On this channel you can discuss the sustainability issues in simple and casual way. So, make sure you are updated with our interesting videos. Subscribe to our youtube channel : **su-re co**

One Island One Voice – Small Action to Protect Bali's Environment

Plastic pollution is now becoming a critical issue in the world, including Indonesia. It pollutes our land, beach, and sea that can be harming the life at each ecosystem.

In order to reduce the effect of

plastic pollution, an action *Bali's Biggest Clean Up* was initiated by Bali's young generations 'One Island One Voice or Satu Pulau Satu Suara'. They engage people across Bali to organize and coordinate clean up in their area. su-re.co was one of the

coordinators! su-re.co was really excited to be part of this action. We coordinate an afternoon beach clean up at Munggu Beach on February 15. With the help by several people, we can help prevent 30 kg of trash to bother the marine life.

In total, there were 12.500 people taking action to clean up Bali's beautiful island on that day and successfully collected 20 tons of trash! Small act that is done huge number of people can create a valuable impact for the earth. We hope this action will raise the awareness of the people to love and save their environment!

Let's make a change together!

su-re.co and the participants worked together to clean up Munggu Beach

(Continued from front page)

you have to do it fast and move on to the next things and not getting stuck on that problem" - Gaspard Blanchet.

Apart from our staff and intern, creating biogas digester is also supported by the locals. Meet Pak Eko and Pak Angga who is helping our team to build biogas digester. As it is easy to create, everybody can then contribute to be a gift maker.
