# SU-RE.CO NEWS

 Vol #28

[www.su-re.co](http://www.su-re.co)

**Online ACT Batch 4: To see, to hear, and to experience the reality of environmental issues in Bali**

**be-tank**

**E**xperiencing Bali's environment can be done from everywhere!

This year, su-re.co and Tigermov has conducted 4 online ACTs for students in Japan. Unlike the usual ACT where the students came to Bali to experience the nature and meet the people, in this pandemic situation all the activities were done online! Thanks to the advancement of technology that we can now connect the locals and the student through

online video conference as well as deliver the experience through live online tour.

The curriculum is designed to meet the goal of creating a transformation in thought and action. The materials are delivered through online lectures by international expert, environmental groups, local people and NGOs that concern in agriculture, waste management, and coffee business.

Did you know?

### Science updates!

**E**verything we do is scientifically proven. Check out our most recent publications to learn more about the technical research aspects behind our activities.

## Sustainability and Resilience Kick-Off Workshop

Thank you for joining the second workshop of TIPPING+ and LANDMARC as part of Horizon 2020 project. In this workshop, we join the events of Indonesia Open Government Week. We really appreciate your participation and interest in making collaboration. For those who could not join the meeting, here we published the recording. Check out <https://www.su-re.co/product-page/the-kick-off-workshop-report>

## The Sense of Healing of the Climate-Smart Candle

do-tank

su-re.candle is made of su-re.coffee ground, natural essential oils and soy wax. The smell of natural essential oil such as Cinnamon, Ginger, Lavender, Mandarin, and Sandalwood will remind you of a typical Balinese aroma acting as a natural stress-reliever.

Apart from having a soothing smelling candle, your purchase will also bring smiles to farmers, by providing them biogas digesters and education on climate smart agriculture.

## Keep the Sea Plastics Free

On May 16, 2021 su-re.co, Baliism and Trash Hero Canggu got together at Munggu Beach to hold a beach cleanup and product display. On that sunny day, 40 participants successfully picked up 76 kgs of non-organic waste on the beach. What a huge amount of trash!

However, only 8 kilos of them are recyclables :(

Munggu beach is the clean up site of Trash Hero Canggu. They conduct the clean up every Sunday afternoon. In this occasion, as a follow up action, su-re.co and Baliism conducted an online

challenge for the participants to post their experience during the beach clean-up as well as to inspire their friends on social media to take a positive actions in protecting our environment.

4 best participants have been rewarded some sustainable gifts by su-re.co and Baliism. Congratulations to Ivandy Nezha, Sri Wahyuni, Chiatsu Ishiodori and Adinda Aulia.

And to all participants, thank you so much for your inspiring action and we hope to see you again in the next clean ups!

**Online ACT Batch 4:** To see, to hear, and to experience the reality of environmental issues in Bali

Good teamwork is one of the key successes of the learning process. At the end of the program, each group delivered a presentation about the current situation of the certain issue and propose some solutions to address that. We are really inspired by their curiosity, caring and outstanding ideas to protect our environment.

Apart from this partnership, su-re.co also provide online SDGs training program. If you are interested to join, check out <https://www.su-re.co/be> for more information!
